## *27<sup>th</sup> Annual Production Sale*

**Thursday • March 19, 2026 • 1 p.m.**

**At the Ranch in Pingree, ID**

*63 PAP Tested Angus Fall Yearling Bulls*  
*120 Registered Angus Spring Yearling Bulls*  
*50 Open Commercial Angus Heifers*

To view a video of sale bulls, go to [www.cartercattleco.com](http://www.cartercattleco.com).

# Welcome to our 27<sup>th</sup> Annual Production Sale

We thank you for taking time to look through our sale book. We know life is busy and you have many choices for your seedstock needs. We would be thrilled if you can find time to join us.

These are exciting times to be in the cattle business. We have witnessed prices I didn't think I would ever see in my lifetime. As prices rose at the meat counter, it was expected that increased costs would lower per capita consumption; however, as reports came out annual beef consumption actually increased over two pounds per person in the US. It is encouraging to know that our customers value nutrient rich beef in their diet.

For those of you who are new to our program, we run our cows out on Forest and BLM permits in some pretty challenging country. We don't wean calves as heavy as the cattle that are kept on irrigated fields where travel is limited and forage and water is plentiful. The native steep and rocky terrain requires more travel to meet forage and water requirements, so naturally it challenges production weights, structural soundness and fertility. In short, it probably differentiates our breeding philosophy from some other seedstock producers as we have worked to help our program adapt. We have included a short explanation on page 14 that may explain why we maintain a "more isn't always better" approach.

One of the more frustrating things for a cattle producer is working hard to develop a nice group of replacement heifers and then having them slowly earn a trip to the sale barn over the next couple of years. It takes time and resources to develop heifers while some are gone in a year, yet others go on to raise 10 calves. I've often asked myself how much more profitable could we be if they all raised 10 calves. With that in mind, we have noted in the footnotes of the sale book some of those cows with average weaning ratios of 105 plus that maintained a calving interval close to 365 days. These are what I consider elite cows. The Pathfinder requirement is 3 calves but many of these cows have 8 to 12. There are many other cows that also maintained that calving interval but had average weaning ratios less than 105.

We are excited to offer you this set of bulls and commercial heifers. We moved our fall cows calving date up two weeks to help with breed up when forage is better quality and there are more daylight hours. We are pleased with the results, and a couple of weeks seemed to help with more size and maturity. We feel like this is the most impressive set of fall bulls we have offered from top to bottom.

Once again, thank you for considering us for your seedstock needs. We welcome your calls with any questions or concerns you may have. We would be happy to show you the bulls anytime here at the ranch and look forward to seeing you on sale day.

Sincerely,  
The Carters

**CARTER**  
CATTLE CO.

# 27<sup>th</sup> Annual Production Sale

Thursday • March 19, 2026 • 1 p.m.

At the Ranch in Pingree, ID

## INSPECTION OF CATTLE

The cattle will be available for inspection anytime at the ranch in Pingree, Idaho.

## FEEDING OF CATTLE

At buyer's request Carter Cattle Co will continue feeding bulls at the ranch until date of need for \$4.00 per head per day.

## HERD HEALTH AND FERTILITY

All bulls will be semen tested and certified as satisfactory breeders. All bulls will sell as virgins unless otherwise stated. All cattle have received calfhood vaccinations of One Shot BVD, Inforce 3, and Ultra Choice 8. At weaning they received Bovishield Gold One Shot BVD, Ultra Choice 8, Inforce 3, and Multimin. In November the bulls were dewormed with Valcor and received a booster of Bovishield Gold One Shot and Fusoguard. In January the bulls got a booster of Fusoguard hoof rot vaccine and a pour on. The heifers will be vaccinated prior to sale day with Bovishield Gold FP 5VL5 and Multimin.

## PAP TESTING

All Fall Bulls (sale lots 1-60) were PAP tested at approximately 1 year of age by Dr Britt Stubblefield, DVM of Florissant Colorado, after running on pasture for the summer at 5,800 feet of elevation. PAP scores will be provided as a selection tool for cattle running in higher elevations. We encourage you to consult with Dr Stubblefield or another qualified DVM to determine what PAP measurement is safe for your individual conditions. They may be reached at Rocky Top Veterinary Service (719) 285-9713.

## GUARANTEE

All Sale Bulls have passed a semen evaluation exam, and we will guarantee them capable of breeding cows; however, injury and sickness do and will occur. In the event of an injury or illness which causes a sale bull to be incapable of breeding cows for a period of 21 days or greater, Carter Cattle Co will make compensation equal to one half or 50% of the purchase price of the affected bull. Guarantee will only be valid on bulls with a purchase price of \$4500 or greater. Compensation will be in the form of a credit at a future production sale or toward a replacement bull if one is available. All guarantees will be limited to the first breeding season only. Breeding season is defined as a 90 day period following the first turn out of the bulls. All injuries must be diagnosed by a veterinarian and all claims must be made by September 1, 2026. We will not be responsible for breeding soundness in subsequent years.

## RETAINED INTEREST

All bulls in the sale will sell with FULL INTEREST and FULL POSSESSION unless otherwise stated in the sale book or day sheet or by announcement from the block sale day.

## VOLUME DISCOUNTS

A 5% discount will be given to buyers who purchase 5 bulls or more. **No discounts will be given on heifer purchases.**

## DELIVERY

We will offer free delivery of bulls to buyers within 500 miles of Pingree Idaho. Buyers who choose to haul their own bulls on sale day or within a week will receive a \$100 per head credit on their purchase. **Free delivery does not apply to heifers;** however, we can deliver or help make arrangements at buyer's expense.

## ACCOMMODATIONS

Best Western Inn - (208) 785-4144

Super 8 Motel - Blackfoot (208) 785-9333

## SALE LOCATION

943 South 1600 West

**FROM BLACKFOOT** - Exit I-15 go west across Snake River bridge, at stop light turn left onto Hwy 39 and travel 15 miles to Pingree store. Continue south on Hwy 39 1.8 miles, go past 700 South then turn left on 1600 West / Birch Rd. (1600 W leaves the Hwy going south at a 45 degree angle). From Hwy travel 2.3 miles south on 1600 West, look for sale barn on left.

**FROM ABERDEEN HWY 39** - Travel to Springfield store on Hwy 39 continue 3 miles east, immediately after crossing railroad tracks turn right on 800 South/Sage Road. Travel 1/2 mile, turn right on 1600 West/Birch Rd. Go south 1.5 miles look for sale barn on left.

With over 1300 calves in his proof, Big Country has been widely accepted across the country. His progeny are structurally correct, good footed and they have great dispositions. He sires added spine length and great eye appeal. He is in the top 10% of the breed for weaning growth. He has over 100 daughters in production that are indexing 101. They have nice udders and good fertility.

Abundance is a Steller son out of a Pathfinder Lightning daughters. He is the 4th best bull in the breed for PAP. He sires moderate birth weight with above average growth. He excels for the maternal traits, being in the top 10% of the breed for HP, \$M and teats as well as top 2% for udders and top 4% for Functional Longevity. His progeny are attractive and have added muscle shape.

Essential is a bull we originally used as a calving-ease sire, but he has proven to be more of a power bull that a calving-ease bull. The calves are really stout with added middle, muscle and performance. They are moderate and wide based. He is very good for Heifer Preg and a very solid PAP sire. His daughters are soft made easy fleshing cows with nice udders.

We have used Accomplishment for 3 or 4 years now. He is a balanced sire without any major holes. He is very proven for PAP with 283 progeny tested landing in the top 4% of the breed. He is moderate birthweight and sires added muscle and base width. His daughters have nice udders with good fertility.

We have used 8148 for several years now. He does so many things right that it is hard to find another sire to equal him. He sires moderate birth weight with sufficient growth. His progeny are attractive with excellent feet, good forerib and middle. He is a proven PAP sire in the top 10% of the breed. His contribution is his daughters. They are very fertile and productive and have great feet and udders. He is top 1% for teats and udders and top 3% for Claw. If you are keeping your heifer calves, these 8148 sons are the way to go.

## M Diamond Ranahan 111

This is our first set of Ranahan calves. He is a proven calving-ease sire that sires more growth and shape than you would expect from a calving-ease bull. His calves are long bodied and big middled with good feet. He is a proven PAP sire at the top 2% of the breed. His calves check a lot of boxes, with great eye appeal, good growth and carcass traits. I think you will like this sire group on sale day.

## S M C Elevate

Elevate is the #2 bull in the breed for PAP EPD. His progeny are moderate but packed with muscle. They are eye appealing with excellent structure and near perfect feet. Elevate checks a lot of boxes with top 10% Functional Longevity, top 1% \$Maternal and over +300 \$C. They aren't extreme growth but come in the right package and are cattle that will last a long time.

## Carter Extraordinary 100H

Extraordinary has been one of our top performing bulls here at Carter Cattle Co. He is a home raised bull but he has out performed any A.I. bull we have used. He has over 100 calves @ 99 BR, 105 WR and 106 YR. He comes by it honestly. His 10-year-old dam just dropped her 8th calf and currently has 7 calves @94 BR, 107 WR and 4 @ 101 YR. They are moderate with added middle and base width and great dispositions. He is top 10% of the breed or better for Teat, Udder, Functional Longevity, PAP, and \$M.

## Matching Your Genetics to Your Environment

As seedstock operators, one of the biggest challenges is to strive to communicate to our customers the focus and goals of our operation. As you look across the industry, there are many clever marketing slogans and campaigns that are designed to set breeders apart from the crowd and attract customers. I marvel at the great pictures and beautiful graphics used to represent different programs. I wish we were better at that aspect of the business, but to be honest that is not our forte.

Our tag line at Carter Cattle is, "Angus made to Use." Creative and exciting I know, but what does it mean? What are we trying to convey? We are blessed to be able to summer our cattle in some beautiful country. It is a wonderful part of the world but it has its challenges. The water is limited and the allotments are large. Grass can be scarce on a dry year and cattle have to travel long distances to get to water and the best grass. Much of it is at high elevations. We don't come off of those allotments until October 1st, so early weaning is not an option. I'm not complaining, just pointing out some of the challenges, similar to those faced by many of our customers.

So back to our tag line, we have discovered through the years that we have to have very practical cattle to thrive in our environment. We have to monitor mature size and growth curves. We have found that big framed cattle with breed-leading growth that are stacked with high terminal traits will be the ones that are likely to be opened in the fall. Hence, we need cattle that "are made to use" in the real world. That is what will succeed in our environment.

When you go through our sale book, you won't find many bulls that are +150 for YW or at the top of the breed for \$C. We do concentrate on the maternal traits with an emphasis on fertility, longevity, good feet, udders and PAP. We do know how to add and know there are sires in the industry that are much higher on the terminal traits than what we offer, but through years of experience we have found what works for us. It seems to be working. You can have all the genetic potential in the world, but if your environment doesn't allow an animal to reach that potential it can actually become a detriment. This year on an average moisture year we had about 5% opens, which is better than in past years.

As we strive for balance and avoid extremes, we hope that our cattle will work for you. We are honored to have you as our customers and appreciate your confidence in us.

### PRODUCTION

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Dolcility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

**Pulmonary arterial pressure EPD (PAP)**, is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

### MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Teat Size EPD (Teat)**, expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

**Udder Suspension EPD (UDDR)**, expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

**Functional Longevity EPD (FL)**, expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

### CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

### \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Combined Value (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

### WEIGHTS & RATIOS

**Ratios (WWR, YWR)** - Ratios are used to compare cattle within the same herd. The herd average for a given trait is 100, so for example an animal that ratios 101 for a given trait would be 1% above the herd average and an animal that ratios 99 would be 1% below the average.

**PATHFINDER** - The Pathfinder Angus program was started in 1978 in an effort to identify superior cows in the breed based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis was placed on early puberty, breeding and early calving, followed by regularity of calving and above-average performance of the offspring. To qualify initially, a cow's first three calves must post a minimum average progeny weaning weight ratio of 105. In addition, an important part of the report is the list of bulls that have sired five or more qualifying females. The Angus Pathfinder Report identifies cows that have excelled in production based on AHIR records of performance. To qualify for the report, a cow must have produced a calf measured through AHIR in the past 18 months.
